WORLD LEADERS IN KIOSK DESIGN AND MANUFACTURING

WWW.KIOSK.COM

GO WITH THE WORLD LEADER IN KIOSK DESIGN AND MANUFACTURING

Since opening our doors in 1993, we've satisfied the needs of discriminating customers around the world, including FedEx, Wal-Mart, Safeway, Pepsi, McDonald's, and hundreds more. With a pronounced emphasis on excellence in engineering and production, KIOSK Information Systems has become a brand leader, pushing the category to greater heights in usability, ROI, and innovation. We'd love to have you join our extensive list of satisfied customers. Read on to learn more about the values that differentiate us from the pack, and why a KIOSK experience is unlike any other.

EXPERIENCE

PUT OUR KNOW-HOW AND EXPERTISE TO WORK FOR YOU. As North America's largest manufacturer of kiosks, we've developed products for countless environments and applications. Our customers benefit from this experience through reduced costs and production times, and receive a flawless in-field deployment.

QUALITY

YOU'LL FIND IT IN EVERY ONE OF OUR SELF-SERVICE TERMINALS. As the industry leader, we set the standard when it comes to producing self-service terminals. The KIOSK Information Systems manufacturing facility is ISO-9001 certified, so you can be assured that your end product meets the highest standards. Before they're shipped, each unit is inspected rigorously to ensure its electrical, mechanical, and structural components meet our exacting criteria.

SAFETY

WE WORK WITH UNDERWRITERS LABORATORIES® TO SIMPLIFY CERTIFICATION. To meet the highest safety standards, many clients require Underwriters Laboratories® (UL) Certification of their project components, materials, and system level safety prior to deployment. KIOSK initiates the UL Certification request documents on behalf of the customer so that parallel progress can be made on the prototype build during UL's analysis cycle. Typically, final system level evaluation and testing is done by a local UL Representative within days of the prototype completion. By working in parallel with UL in early prototyping stages, KIOSK is able to condense the overall delivery timeline for certified equipment.

CAPACITY

WITH KIOSK INFORMATION SYSTEMS, UNPRECEDENTED PRODUCTION CAPABILITIES ARE AT YOUR DISPOSAL. Nestled in the foothills of the Rocky Mountains, our 65,000 square-foot facilities can produce more self-service terminals in a day than our competitors can in a month. This offers our customers the ability to deploy 1, 10, or 10,000 kiosks to the marketplace quickly and cost-effectively.

FLEXIBILITY

FROM STANDARD TO CUSTOM REQUIREMENTS, WE OFFER A FLEXIBLE SOLUTION. KIOSK Information Systems strives to tailor each kiosk to the unique operational requirements of our customers. We offer more than 30 pre-existing designs, which can be customized to match the image and personality of your brand. And for more demanding projects we have in-house design, engineering and in-house graphics capabilities that create custom self-service terminals for many of the world's most prestigious companies, universities, and governments.

SERVICEABILITY

OUR PRODUCTS ARE DESIGNED FOR EASY MAINTENANCE AND BETTER ROI. Each of the components in our self-service products can be serviced easily in the field. We ensure that access doors are available for any type of environment no matter where your kiosk is placed. This approach to design significantly reduces your total cost of ownership by limiting the number of service calls and allowing you to service only those components that need maintenance.

THE OPPORTUNITIES ARE ENDLESS ...

- **HUMAN RESOURCES** job kiosks, 401K benefits enrollment, employee scheduling, management and training, direct deposit, paycheck verification and printing
- **MULTIMEDIA** photo, music, ringtones and pay-per-use internet access
